

TEMPERATURE OF THE CANS

Record the temperature of the cans using a laboratory thermometer in the table below.

My prediction: The can covered in the sock will keep the can the coolest.

	0 mins (°C)	2 mins (°C)	4 mins (°C)	6 mins (°C)	8 mins (°C)	10 mins (°C)	Change in temperature (°C)
Temperature of can covered in wool sock							
Temperature of can covered in cotton sock							

The result: The can covered in the sock kept the can the coolest.

Name:
